

Universal Products

- Mandrel bent elbows and bends for use in building custom exhaust systems.
- Mandrel U and J bends – get 3 different bends from one pipe: 45, 90 and 180 degrees.
- Y Connectors – for installing dual tail pipes on trucks using a single outlet muffler.
- Universal Flex – for use in pipes that need flex-only replacement.
- Muffler Straps – for ease of installation with UltraFit Direct Fit Mufflers.
- Universal Mufflers & Converters – for installation on custom applications.

Why UltraFit?

Working with UltraFit means working with a partner that delivers an impressive product line of over 3,000 SKU's of all the top movers. Not only do our product lines represent 85% of a WD or Jobber's needs, we back them with a solid 98% fill rate.

With delivery to most points within North America in 5 days or less, we make it easy for you to compete – on price, on quality and on service. The result? Bigger margins and a healthier bottom line. That's the kind of partnership we all need.

UltraFit
Exhaust Systems
The Real Alternative

At UltraFit Exhaust Systems we know the exhaust business better than anyone.

Our entire line of prebent and universal fit products are built to reflect our commitment to the four cornerstones of our business – quality, dependability, friendly service and competitive prices.

UltraFit pipes fit most makes and models of cars and light trucks – domestic and foreign. Our line of mufflers in both direct fit and universal fit models have the solid backing of our own UltraFit warranty and our direct fit catalytic converters including OBDII applications are CARB and EPA approved. Our ISO designation is a part of everything we do every day. With UltraFit, you'll find a quality range of exhaust products that represent the top movers in every line, at a price you can live with.

Direct Fit Catalytic Converters Maximum Performance. Proven Durability.

Count on our full line of direct and universal fit UltraFit catalytic converters to deliver top value and long life.

- All-welded seams minimize expansion.
- ½ inch lap joints ensure a tight seal.
- XL/LEV special direct fit applications.
- High flow honeycomb catalyst maximizes surface area and gas flow.
- Ribbed body construction adds strength and rattle resistance.
- Heat shields are welded to converter body.
- Order by application, competitor part number or UltraFit part number.
- Online look-up by Year, Make, Model or UltraFit part number.

Direct Fit Mufflers High Quality. Heavy-Duty.

Available in round and oval, wide-body shapes to fit most late-model domestic and import cars, SUV's and light trucks. The perfect fit to complement our line of direct fit catalytic converters and pipes.

- Double wrapped with opposing locked seams.
- 2 or 3 tube partitions and 2 or 3 baffle plates are welded assemblies to prevent rattles.
- Partitions and plates have expandable centres or offset aluminized end nipples for easy installation.
- All-aluminized outer shells and end plates for toughness and durability.
- SKU numbers that match with most competitive brands.

Direct Fit Pipes The Right Fit. The Right Price.

UltraFit direct fit all-aluminized pipes are produced to match and interchange directly with major aftermarket manufacturers.

- OEM style flanges and brackets for quick and easy fit.
- High quality, all aluminized construction virtually eliminates warranty claims.
- Dependable UltraFit warranty.
- Easy to identify multi-coloured labels match competitors' SKU numbers.

Direct Fit Front Pipes Fit. Form. Function.

When quality and the right fit are crucial. UltraFit all-aluminized pipes are built to match and interchange directly with major aftermarket manufacturers.

- OEM style flanges and brackets for quick and easy fit.
- High quality, all-aluminized construction virtually eliminates warranty claims.
- Stronger Inner Lock or Inner Braid flex.
- Dependable UltraFit warranty.
- Easy to identify multi-coloured labels with matching competitors' SKU numbers.

Front Repair Pipes Replace the Flex. Save the Converter.

- Constructed with tough reinforced Inner Lock flex.
- A dependable alternative to converter replacement.
- The right answer for cost-conscious customers.
- Builds versatility in your product line.
